1. Lay Field Panel on a flat surface, with mounting holes in high or low mount position (see images at right).
2. Set Backing Plate (A) into each set of panel screw holes.
3. Secure each Clamp (B) to a Backing Plate (A) with screws. Be sure T-Handle (C) is positioned below desk top.
4. Tighten Clamps (B) with T-Handles (C) to desk surface. Do not over tighten.

*Small clamps work best for side panels. Large clamps work best for back panels.*
